ANTI TORPEDO – TORPEDO

TORK

Anti Torpedo – Torpedo

Hard-Kill Torpedo Countermeasure System

- For surface ships
- Effective solution against all existing and modern torpedoes
- Modular, indigenous and State-Of-The-Art design
- Integrated operation with Soft-Kill countermeasure systems

TORK; approaches to torpedo threat with active homing guidance and explodes at effective range to destroy or harm to stop its operation.

TORK; is an anti-torpedo torpedo to physically destroy or harm torpedoes to stop their attacks during torpedo countermeasure operation of strategically important surface ships of naval forces defined as high value units.

TORK is developed with the support of TUBITAK TEYDEB 1501 program.

Physical Specifications

- Diameter : < 30cm
- Length : < 3m
- Weight : < 200kg
