## BLUE FORCE TRACKING SYSTEM

BTS is an integrated situational awareness system for land based and naval combat vehicles.

The track information gathered from the Integrated positioning terminals on combat vehicles are transmitted to BTS server by means of communication systems. The friendly force positions on BTS server are shared with the C4ISR systems.

### Positioning

- GNSS based

### Communication Systems Supported

- ASELSAN SK2 Radios
- ASELSAN 9600 Radios
- ASELSAN Software Defined Radios
- Globalstar Satellite Communication System
- GSM, LTE/4G
- Other Tactical Radios (optional)

### Interoperability

- NFFI (NATO Friendly Force Information)
- C4ISR Systems (optional)
